Hello TAMWG. Attached is a slightly revised version of the Executive Director Report that was provided to TAMWG at your last meeting.

Minor edits were made to correct small items and a few things were moved into better locations in the report. The only addition or substantive change was the addition of this text under Implementation:

Miscellaneous

The 391 River Acres Road house in Junction City which is within the modeled maximum fisheries flow inundation line, remains unsold. The house and 3.25 acres are currently listed for \$375,000. Conversations with Reclamation Mid-Pacific Office realty indicate that the compliance and realty purchase steps (e.g. archaeological review, NEPA, title search) could add over \$100k to the cost of the acquisition, bringing it to around a half million dollars. A letter of interest could be drafted for the sellers, but not until funding is authorized to initiate compliance steps required by Reclamation realty policy.

Thank you.
Caryn
